

GR PRODUCTION SERVICES

Community Matters

PROGRAM APPLICATION FORM

For nearly 30 years, GR Production Services (GRPS) has operated and maintained assets and facilities for the energy and resources industry.

With most of our Australia-wide projects based in regional areas, we recognise the importance of supporting socially-minded organisations in the communities we work. These organisations are often the driving force which enables the sense of community with their initiatives generating positive impacts.

Purpose of our Community Matters Program

To meaningfully contribute to the social development of the communities where we work. Our 4 program pillars where we provide support and funding are:

Community - to engage and connect people and business.

Education - to build skills for the next generation.

Women - to empower and increase industry visibility.

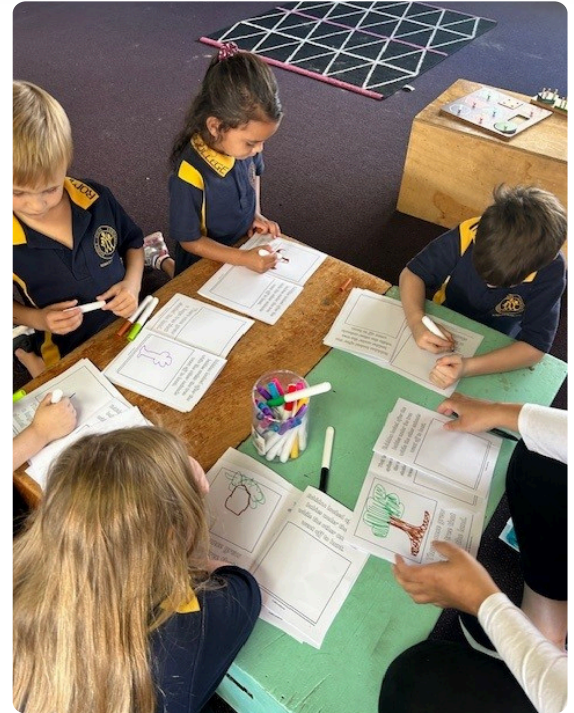

Indigenous - to support inclusion and participation.

Principles for application

All Community Matters applications will be assessed on the following principles:

- Must be within regional areas where GRPS work.
- Must benefit the community in a positive way.
- Must align with GRPS Community Matters pillars.
- Must acknowledge GRPS support.
